Personal

Master's student (M1) in Applied Mathematics at ENSIIE, with a first hands-on experience in applied artificial intelligence (3-month internship). Interested in the pragmatic use of AI to automate tasks, improve operational efficiency, and deliver concrete solutions to business needs. Currently seeking a 3-month internship in applied AI and digital transformation starting mid may 2026.

Education

Master 1 – Applied Mathematics (in progress) **September 2025 – Present**
National School of Computer Science for Industry and Business (ENSIIE) *Évry, France*
– Courses: Supervised and unsupervised learning, stochastic processes and calculus, operations research, regression methods, time series, simulation methods; programming (Python).

Engineering Cycle – Grande École program – First Year (1A) **September 2024 – May 2025**
National School of Computer Science for Industry and Business (ENSIIE) *Évry, France*
– Courses: Probability, statistics, graph theory, data analysis, databases, programming (Java, C, OCaml).

Engineering Degree – Applied Mathematics and Statistics **2021 – 2024**
Institute of Technology of Cambodia (ITC) *Phnom Penh, Cambodia*
– Preparatory cycle and intensive scientific training (common core), equivalent to French preparatory classes for Grandes Écoles.

Experience

AI FARM ROBOTIC **May 2025 – August 2025**
AI Engineer Intern *Phnom Penh, Cambodia*
– Project: *SnapAI* – Khmer text extraction from natural scene images.
– Implemented text detection and recognition models (EAST, PARSeq) with a focus on fine-tuning using LoRA. Python development.

Entrepreneurship Challenge – 26th Edition (IMT Starter) **October – November 2025**
Inter-school entrepreneurial project *Évry, France*
– Participated in a competition bringing together 100 teams, each composed of 6 students from Télécom SudParis, Institut Mines-Télécom Business School, and ENSIIE, with the objective of creating a startup.

Projects

Credit Score Analysis and Risk Management | Python **September – December 2025**
– Team project (5 members): data analysis including EDA, dimensionality reduction (PCA), and default risk modeling using logistic regression, Random Forest, and XGBoost.

Regression Methods | R **September – December 2025**
– Pair project: logistic regression with variable selection (AIC, Lasso, Elastic Net), class imbalance handling, and modeling of high-dimensional clinical and genomic data.

Image Processing | C **December 2024 – January 2025**
– Reading, writing, and processing images in PGM and PPM formats.

Hospital Appointment Management | Databases (SQL) **March 2024 – May 2024**
– Design and implementation of a database system for hospital appointment management.

Skills

Technical Skills

Python: NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV, etc.
Web Development: HTML, CSS, PHP, SQL.
Deep Learning: PyTorch (model fine-tuning, LoRA), CNN-based text detection (EAST), sequence models (PARSeq).
Other: R, C/C++, Java, OCaml, Bash, Git, L^AT_EX, Microsoft Office, Canva.

Soft Skills

Adaptability, Analytical thinking, Problem solving, Curiosity, Time management, Team-work.

Honors and Certifications

French Government Scholarship – <i>France Excellence</i>	April 2024 – June 2026
<i>Recipient of a two-year excellence scholarship</i>	<i>France</i>
Technovation Girls Cambodia 2020	June 2020
<i>Top 10 National – ROAM application</i>	<i>Phnom Penh, Cambodia</i>
– International 12-week technology entrepreneurship program.	

Languages

Khmer: Native **English:** B2 (IELTS) **French:** DELF B1
